DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6, 10-15 and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eaton et al. (US 6351692) in view of Jordan (US 6172428).

Eaton et al. disclose a controller for controlling one or more generator sets connectable to a load, each generator set having the ability to be started and stopped (130) and including a generator communications link (Column 8, lines 37-45) for connecting the generator set to a network, an engine (152), and a generator driven by the engine; the controller comprising:

a user interface (Column 4, lines 20-24 and Column 6, lines 30-41) for allowing a user to select a generator set and to set values for various predetermined operating parameters of the selected generator set (column 6, lines 42, 48); and

a communications link connectable to the network for transmitting the user set values of the predetermined operating parameters to the selected generator set;

a monitoring structure (Column 6, lines 8-12) capable of displaying information.

Art Unit: 2834

However, it fails to disclose the icons identifying the generators. Jordan teaches the use of the icons for the purpose of displaying messages.

It would have been obvious to one skilled in the art at the time the invention was made to use the icons disclosed by Jordan on the control system disclosed by Eaton for the purpose of displaying messages.

3. With regards to the method claims, it has been held that to be entitled to weight in method claims, the recited structure limitations therein must affect the method in a manipulative sense, and not to amount to the mere claiming of a use of a particular structure. *Ex parte Pfeiffer*, 1962 C.D. 408 (1961).

Allowable Subject Matter

4. Claims 7-9, 16-18 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
